Criteria for Selecting Projects

For MGV Office Use:

County Level Evaluation Criteria (check all that apply)

Yes No

Contains a well defined educational component _____

Develops Master Gardeners' horticultural knowledge, skills, and experience _____

Promotes partnerships with service, civic, youth, school, or government groups _____

Facilitates community involvement, service learning and volunteerism _____

Requires little or no garden or landscape maintenance component _____

Consistent with one or more of the State MGV Initiatives (check all that apply)

Backyard & Local Foods _____

- Project relates to fruit, vegetable or herb gardening for home or local consumption. Examples: community gardens, demonstration or school vegetable gardens or public education seminars.

Community Service _____

- Project helps support the community and leads to a raised awareness of the OSU Extension MGV program. Examples: planting a flower bed around a courthouse or at fairgrounds, participating in a community clean-up event, or others. Note: if this project has an educational component it should go into the other appropriate category.

Environmental Horticulture _____

- Project relates to teaching people about the "benefits of plants" for the environment (rain gardens), communities (tree inventories or "Why Trees Matter" programs) or people (horticulture therapy, children's gardens plant talks).

Integrated Pest Management _____

- Project relates to integrated pest management including the selection, care and best management practices of plants. Examples: demonstration & school gardens (not related to food production), plant trials, plant sales, garden shows, fair booths, hotlines, or public education seminars.

Invasive Species _____

- Project relates to activities focused on any invasive plant or insect. Examples: invasive species removal efforts such as honeysuckle, garlic mustard, etc., educational programs or display on invasive species.

Project Approved: _____ Yes _____ No
